- A. using the Hyperbolic Viewer
- B. opening the Impact view and displaying the successors
- C. opening the Job Stream Instance editor for its Job Stream Instance

D. opening the Dependencies window and drilling down to the successors

Answer: B

NO.13 When using the Tivoli Dynamic Workload Console, which monitor tasks are available to the user?

- A. all those that have been created by all users
- B. just those created by the user in the current session
- C. all those created by the user and shared with user's login group
- D. just those where the connection engine specifies the user's logon

Answer: C

NO.14 One of the schedulers has submitted an ad hoc job to list a particular directory. Which command should be used to view the output of the ls command through IBM Tivoli Workload Scheduler?

- A. conman "sj CPU#jobs.ls;joblog"
- B. conman "sj CPU#jobs.ls;stdlist"
- C. jobman "showjoblog CPU#jobs.ls"
- D. jobman "showjoblog CPU#jobs.ls;stdlist"

Answer: B

NO.15 In which order are job stream / job dependencies resolved?

- A. predecessor - start time - prompt - file - resource
- B. start time - prompt - predecessor - resource - file
- C. prompt - predecessor - start time - file - resource
- D. file - start time - prompt - resource - predecessor

Answer: A

NO.16 What are two circumstances for which it may be advisable to use the silent uninstallation method instead of an interactive method? (Choose two.)

- A. The Administrator is unable to successfully export DISPLAY to a remote server.
- B. IBM Tivoli Workload Scheduler is installed on a server for which there is no console access.
- C. DNS is not working properly and the server cannot be accessed remotely to run the uninstallation script.
- D. TCP on the server on which IBM Tivoli Workload Scheduler is installed is configured for half-duplex rather than full-duplex.
- E. The remote IBM Tivoli Workload Scheduler server is multi-homed, thus

the return connection to IBM Tivoli Workload Scheduler cannot be established thereby requiring the use of the silent uninstaller.

Answer: AB

NO.17 Using the Tivoli Dynamic Workload Console, what are two ways to change the priority of a job? (Choose two.)

- A. Open the "Set Priority" panel from the job properties.
- B. Change the priority of the job stream that contains the job.
- C. Select the corresponding action from the Monitor jobs task panel.
- D. Open the job stream properties and drill down to the job priority panel.
- E. The priority of a job can only be changed from the Workload Designer.

Answer: AC

NO.18 What is the correct command to stop the currently executing job "test" in JOBS job stream on a local machine?

- A. conman "k test"
- B. conman "cj test"
- C. conman "k jobs.test"
- D. conman "cj jobs.test"

Answer: C

NO.19 Which report will provide information on the most recently completed plan?

- A. Report 08 - Job Histogram
- B. Report 07 - Job History Listing
- C. Report 10B - Actual Production Detail
- D. Report 11 - Planned Production Schedule

Answer: C

NO.20 After making changes to the monitoring configuration file for the event monitoring engine on an agent, which conman command will force the change immediately?

- A. loadconf
- B. resetconf
- C. deployconf

D. deploymonman

Answer: C
